

# VB1200 Abrasive Blast & Recovery System

*With Shipyard Cage*

(866)402-2202

Sales, Service & Parts

In Hawaii

**HOW THEY WORK-** Designed for contained open or vacuum blasting, the VB1200 system blast abrasive through two blasting outlets onto the surface being finished. Our high powered vacuum units, recover the spent abrasive where the dust and waste are separated. The used abrasive is recycled and returned to the storage hopper for re-use.

## Dust Free Vacuum Blasting or Contained Open Blasting

This powerful system provides maximum worker protection... continuously recycles abrasive... separates the dust... and delivers high productivity. The results? Safe and extremely cost effective decontamination and surface preparation.

### **VB1200 Technical Data:**

#### **Air Consumption:**

- Blast Pot 325 cfm per #7 blast nozzle
- Vacuum 275 cfm per Jet Vac Pump

#### **Dust Collector w/automatic pulse Jet cleaning:**

- Filter Type Cartridge closed one end
- # of filters Four
- Air to Cloth Ratio 1.5 to 1
- Easy filter change thru the dirty air side of collector

#### **Blast Pot 150 psi rated dual outlet:**

- # of Outlets Two
- Valve type Thompson II Valves
- Capacity 16 cu./ft.
- Deadman Two electric (12V)

#### **Storage Hopper with vibratory separator screen:**

- Capacity 16 cu./ft.
- Vacuum inlet 4"

#### **Vacuum System with Silencers:**

- # of Jet Vacs Two
- Vacuum Performance 1400 cfm @ 18" Hg

**Skid Mounted** with fork lift pockets, lifting eyes & shipyard lifting frame

**Fold-Down Work Platform** to access clean-outs and inlet

**Stainless Steel** valves and fasteners

**(2) Work Heads w/100' Blast Hose**

**Hurricane Vacuum hook-up**

#### **Dimensions**

- 10'2" H X 4'8" W X 11' Long
- Weight 3250 lbs

#### **Electrical Controls:**

- 110 VAC

**One Year warranty** on all non-wearing parts, labor included for the first six months

**FOB:** Johnston, RI

Taxes extra where required-quote valid for 30 days
